

Tools

Of course you can use any medium you prefer to work in. There are no rules just suggestions! The most important part is that you are trying so have fun and do what feels best for you. Use this as a step by step lesson or use it as inspiration and take the ideas that resonate most with you!

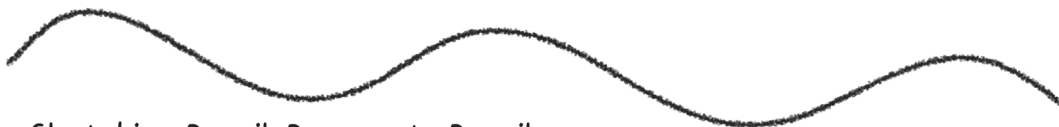

When I first started drawing again after many years of not drawing at all, I chose a traditional sketchbook and colored pencils. They were most comfortable for me and also easy to clean up! I didn't have a dedicated work space so this helped me to start without feeling overwhelmed. A few years ago I switched over to the iPad and tried various drawing apps, I fell in love with Procreate and use it for the majority of my work now. I love digital drawing because it is so flexible, forgiving of mistakes, doesn't require a large workspace and supplies and is easy to use once you are familiar with the basics of the app.

Here are the tools I used for this project:

- *Apple iPad
- *Apple Pencil
- *Procreate App
- *Digital Brushes-For this exercise I used the free brushes-

Sketching Pencil: 6B

Sketching Pencil: Procreate Pencil

Color Palette
