

Step-by-step tutorial

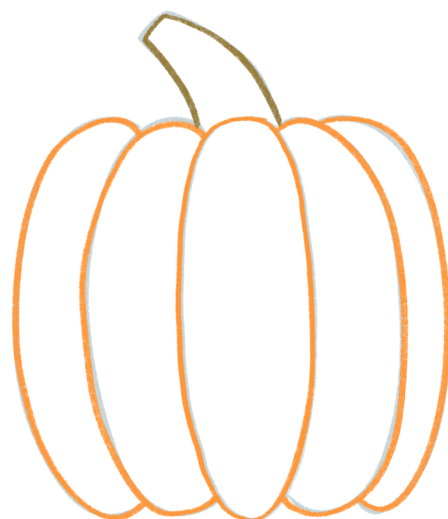

1. Start by making an oval. This can be skinner or fat oval. Whatever you prefer!

2. On either side of that oval, add a partial oval on either side. Make sure the ends of each oval touch the first oval in the middle.

3. Now add 2 more partial ovals onto the end of the previous 2 just added. Make sure the ends of the new ovals touch the previous ovals. Now you have the body of the pumpkin.

4. The last step is to add the stem. For this you will make 2 curved lines with a straight line at the top.
