

White Outline

1. Use your drawing as a guide.

2. Open a new layer underneath your drawing. Color in the pumpkin with a darker orange using the 6B digital brush. Then color in the stem using a darker green from the palette.

3. Open a new layer above the colored layer and add some lighter orange texture on top of the darker orange. Add some lighter green lines to the stem. Finally, add a layer above the outlined pumpkin and create clipping mask. Fill that layer with white and it will turn outlined drawing white.
